

# SmartHub.ai

## AI/ML driven Automation for Edge Devices

SmartHub.ai offers AI/ML powered Enterprise IoT Edge S/W solutions (**SmartHub INFER™** & **SmartHub NeuralEdge™**) that monitors, manages & provides intelligence across your heterogenous, non-IT managed endpoints (IoT devices & sensors). With rising concerns around vulnerabilities, risks, lack of visibility to enterprise IoT Edge, inability to patch/update disparate IoT endpoints & inability to effectively tap into intelligence coming from edge, enterprises are increasingly focusing their efforts & investments in monitoring, managing & leveraging the Edge, to accelerate their Digital Transformation Journeys

### EDGE DEVICE LIFECYCLE MANAGEMENT

Discover, manage & secure heterogeneous things (sensors, devices) and gateways with diverse hardware, operating systems, and communication protocols

### SECURITY ACROSS IOT VALUE CHAIN

Secure your IoT Devices through vulnerability detection and remediation using AI-based Behavior Analytics & Threat Intelligence. Securely onboard, authenticate, and authorize for ongoing communication, OTA updates on secure channels and contain threats using enterprise wipe

### SINGLE PANE OF GLASS

A single pane of glass for both IT & OT users to view, manage and act on control plane (IoT infrastructure composed of edge systems and connected devices/sensors) and content plane (data & business insights)

### ENTERPRISE INTEGRATIONS

Quick and easy integration with vertical-specific leading enterprise systems through REST APIs; along with flexible edge integrations through C, Python & Golang based SDKs

### PREDICTIVE ANALYTICS

Identify anomalies with real-time monitoring, perform infrastructure analytics, gain actionable business insights, optimize operations & KPIs through ML based models & AI

### HIGHER UPTIMES VIA PREVENTATIVE MAINTENANCE

AI-driven predictive failure analysis of devices, sensors, and preventative maintenance insights. Allows better planning for maintenance, repair work & ordering critical equipment to prevent expensive downtimes

### CONTINUOUS COMPLIANCE

Bring accuracy, specificity & context to edge incidents - for better compliance, safety, remediation & automation. Prevent expensive violation penalties

### FLEXIBLE & SCALABLE DEPLOYMENT

Offered as highly scalable on-premise, cloud or hybrid solution for deployment flexibility and security

# SmartHub.ai

SmartHub.ai is a fast-growing, spin-off from VMware, headquartered in Bay Area, CA and offices in Seattle and Bangalore.

With strategic investments from leaders in infrastructure management & edge computing, SmartHub.ai is redefining the Enterprise Edge IoT space. SmartHub INFER™ product suite, specifically designed for the edge & AI workloads, is a set of AI-powered S/W products that accelerate edge endpoint management & intelligence. We help companies simplify the complexity of Enterprise IoT Edge lifecycle management, break data silos and leverage your edge investments to achieve meaningful outcomes like Zero downtime, real-time health monitoring of your edge infrastructure, higher productivity, better operational efficiencies, continuous compliance, and risk management
